(1) It is prohibited to touch the heat sink 10 minutes after power on or for a while after power off to prevent getting burnt;

(2) Do not operate the drive on and off frequently and re-energization is prohibited within five minutes after power switched on again;

(3) Do not remove the drive cover or touch the printed circuit board under power on state to prevent electric shock;

(4) Working as wiring and inspections should be carried out only after the power

(6) No object is allowed to drop into the inverter.

(1) The inverter is prohibited to be [illegible] flammable [illegible];

(2) This series of inverters are not suitable in flammable [illegible]
